100% RENEWABLE

## Innovation and Sustainability: The Heart of INEXPACK

Since its founding in 2003, INEXPACK has stood out for its innovation and commitment to sustainability. With the pioneering "Third Millennium Project", launched in 2005, the company redefined packaging standards for food and chemical products, prioritizing modern and competitive. INEXPACK is proud of its trajectory marked by excellence, always aligned with ethical, environmental and social principles.

**Cutting edge technology**

**Customized Solutions**

**Sustainability in Focus**

**Security Guaranteed**

**Lasting Partnerships**

## Eco-Innovation: INEXPACK's Sustainable Future

Focusing on innovation, INEXPACK brings to the packaging market, the combining advanced technology with environmental responsibility to create a brighter future sustainable.

### Eco-friendly Materials

We use environmentally friendly and biodegradable materials, ensuring sustainable packaging that reduces environmental impact and promotes resource conservation natural.

### Efficient Production Processes

We adopt advanced technologies and efficient methods that minimize waste, save energy and optimize the use of resources, ensuring more efficient production clean and sustainable.

### Recycling and Reuse Programs

We implement innovative recycling and reuse programs, encouraging the circularity of materials and contributing to a more sustainable economy, aligned with environmental responsibility practices.

## The Sustainable Choice

**InexPack**

Developed with biodegradable materials that decompose efficiently and ecological, minimize damage to ecosystems, avoiding pollution by micro plastics that affect marine and terrestrial life. Generates significantly lower carbon emissions, promotes efficient recycling and reuse of its packaging.

A package of truth and made of responsibilities
